

DentalCare Pro - Administrator Guide

Practice Configuration, Security, Multi-Chair LAN & RBAC Setup

1. Practice Profile & Operatory Management

As the practice administrator, configure clinic parameters under **Settings > Clinic Profile**:

- **Operatory Chairs:** Define dental chair names (e.g., Chair 1 - Hygiene, Chair 2 - Restorative, Chair 3 - Surgery, Chair 4 - Ortho).
- **Clinic Operating Hours:** Configure opening/closing times per weekday. Appointments outside hours will be flagged.
- **Taxes & Currency:** Configure your currency symbol (\$ / £ / € / ■) and dental service tax exemptions.

2. Staff Accounts & Role-Based Access Control (RBAC)

User Role	Permissions & Access Scope	Recommended Computer
Administrator	Full practice management, user creation, tax setup, logs, backup & restore.	Owner / Office Manager PC
Dentist	Patient charts, Odontogram, clinical notes, prescriptions, treatment plans.	Operatory Chair PCs (1-4)
Hygienist	Periodontal charting, cleanings, prophylaxis, oral hygiene records.	Hygiene Suite PC
Receptionist	Patient scheduling, intake, billing, payments, receipt printing.	Front Desk Reception PC

3. Multi-Workstation Clinic LAN Deployment

DentalCare Pro supports multi-computer clinic LAN operation over Wi-Fi or Ethernet:

1. **Host Server PC (Reception):** Installs DentalCare Pro with PostgreSQL database.
2. **Operatory PCs (Chairs):** Connect to Host PC IP address (e.g., `http://192.168.1.100:3000`).
3. **Live Sync:** All appointments and charts synchronize in real time over WebSockets with zero lag.
