

DentalCare Pro - Backup & Disaster Recovery Guide

Automated Data Protection, Encryption & Safe Restoration Playbook

1. Automated Daily Nightly Backups

- **Schedule:** The backup engine automatically executes every night at 23:00 (11:00 PM) with zero user intervention.
- **Storage Location:** Saved directly into C:\DentalCarePro_Backups\ as timestamped SQL archives.
- **AES-256 Encryption:** Backups are cryptographically encrypted to safeguard patient health information (HIPAA compliant).
- **Retention Policy:** Backups are retained for 90 days with automated pruning of expired archives.

2. On-Demand Manual Backup (1-Click)

To take an instant backup prior to software updates, fiscal year-end accounting, or computer maintenance:

1. Open the Backup Utility folder inside your DentalCare Pro directory.
2. Double-click **take_backup.bat**.
3. A green confirmation will confirm the creation of your new backup snapshot with size and timestamp.

3. Recommended 3-2-1 Clinic Backup Strategy

- **3 Copies of Data:** (1) Live PostgreSQL database, (2) Daily local backups, (3) Off-site external drive.
- **2 Different Media Types:** Local computer hard disk + External USB encrypted storage drive.
- **1 Off-Site Location:** Weekly, copy C:\DentalCarePro_Backups\ to an external USB flash drive and store it in the clinic safe.

4. Emergency Disaster Recovery in Under 5 Minutes

In the event of hardware failure, disk crash, or replacement with a new computer:

1. Install DentalCare Pro on the replacement computer using **Setup.exe**.
2. Copy your latest backup file into C:\DentalCarePro_Backups\.
3. Double-click **restore_backup.bat** inside Backup Utility/.
4. Select your backup file and type **YES** when prompted. All patient records, odontograms, and invoices are restored instantly!
